

PayrollBook V2.66 Update Instructions

Background: If you experienced error message such as “Object doesn’t support this property or method”, or when you move the cursor pointing to a program button showing as a triangle arrow pointer but not able to click and execute the task, then you should run this update to fix the problem. When you installed Excel 2013 or had an Microsoft office update your Excel 2007 or Excel 2010 will lose the VBA active control feature. Excel 2013, 2016, 2019, 2021 or later versions have screen update problems, and Microsoft has not fixed these problems. So as of now, Excel 2007, Excel 2010 is the best version for ExcelBook and Excel payroll programs.

The zipped folder “ExcelPayrollUPdate.zip” contains three files after your download.(PayrollBookUpdateV2.66.xlsm, PayrollBook_xlsm_32.dll, and PayrollBook_xlsm_64.dll).

To begin: Please unzip it or copy these three files into the same folder of the Excel Program. (Replace the existing files if any)

Step 1. Open the “PayrollBook.xlsm file”

Step 2. Open the update file “PayrollBookUpdateV2.66.xlsm”

Step 3. Click the Update button.

After you see the update complete message, close all Excel program and then reopen PayrollBook.xlsm to start.
